

Focus on  
Couches and Tables

**TREATMENT/EXAMINATION**

# Flexible functionality and improved ergonomics are some of today's needs for treatment and examination couches/tables

---

Unfavourable working postures can create back disorders for nursing staff and doctors who work around treatment and examination couches/tables. Today, focus is on ergonomics and how to avoid back pains and improve working environments in hospitals and private practices. With an electric actuator solution on the treatment and examination couches/tables, **improved comfort and ergonomics** are ensured for both work staff and patients.

LINAK has more than 30 years of experience within the actuator business and can provide electric actuator solutions of very high quality that enable you to create a unique and differentiated product.

As an experienced system supplier of treatment and examination couches/tables, LINAK offers:

- High-quality electric solutions
- Simple systems or customised OpenBus™ systems
- Value-adding features via OpenBus™ technology
- Flexible solutions according to your needs

**FS3 floor model** foot switch designed together with end-users. Very intuitive and easy to use.

# LINAK® offers system solutions

Our solutions have been developed and tested as systems. This ensures the functioning and the safety of our systems.

We can advise the best solutions according to your needs.

The **BL1 column** in aluminium is perfect when you prefer a clean design. No hand or legs can get caught between the moving parts. Optional cables inside the column for aesthetic design, high safety and cleaning-friendly

A well-proven and easy fit system for scissor lifts is the **CA40 control box and the LA40 actuator** solution. This solution **lifts up to 8,000N without disturbing noises.**

The **LA44 actuator** can lift up to **12,000N** providing a safe and heavy lift. It is possible to choose between different control options; foot switch, hand controls or control panels.

**LA43 IC and LA44 IC actuator** is with **integrated control box** and are a **low weight system**. Lifting force is up to 12,000 N. With 3 plugs it is possible to connect a 2<sup>nd</sup> actuator and OpenBus Service Data Tool.

## OpenBus™ accessories

# The health challenge of tomorrow

---

It is a fact that the world faces a great demographic challenge. The proportion of people in need of care grows rapidly. It is also a fact that there will be fewer hands in the future to do the caring, so time and efficiency is of essence.

Today – and even more so in the future – there is a high focus on ergonomics and improved working environments in hospitals and private practices. Studies show that chronic lower back pain is one of the greatest health problems in industrialised societies with large societal costs every year. Therefore, it is essential to have focus on ergonomics, safety and comfort when it comes to treatment and examination of patients.

Only by thinking ahead can we provide the necessary advanced solutions to patients and care personnel, and truly make a valuable difference.

Let us together care for tomorrow today.

## GLOBAL PRESENCE

LINAK® has a well-developed sales and service organisation in Europe, Americas, Asia and Australia. Therefore, we can assist you and your customers locally, under the global sales concept idea:

Be global, act local
